

TL2+ **TL Series** Robotic Case Packer

Simple. Flexible. Affordable.

With a larger robot, the TL2+ case packer is capable of higher payloads and can accommodate deeper or wider cases and trays, as well as multiple simultaneous case loading.

This simple-yet-effective machine easily integrates into your existing line and is easy to maintain and keep running. Most importantly, its installed cost is low, giving it a high return on investment. Our target is for the TL2+ to pay for itself in one year or less.

Automate your line, simply.

FEATURES

- Product infeed accepts randomly spaced products and pneumatically gates them for picking
- Proprietary RPM-designed two-axis robot with a 40-pound payload
- Tool-less changeover in a matter of minutes
- Rockwell machine and robot control. No additional robot controller
- Carton/Case/Tray management system is designed to accept all types of cardboard containers
- Cantilevered design allows the TL2+ to be incorporated into existing packaging lines without modifying conveyors

TECHNICAL SPECIFICATIONS

Specifications	Small footprint (61" x 57")
	Up to 250 products per minute production
	Up to 60 cases or cartons loaded per minute
Options	Power options: 230V or 480V
	Washdown, stainless construction available
	Regenerative blower vacuum system
	Many different infeed variations based on product type
	Case flap opening system
	Lugged case infeed
Loading Options	 Top load cartons – accepts randomly spaced cartons and positions them for loading
	 Top load RSC cases or trays – accepts randomly spaced cases and positions them for loading
	 Third Party Infeeds – Loads products into the stationary or moving flights of a wrapper, endload cartoner, or other equipment
